

## What is Accelerated Reader?

To enrich our reading program we incorporate the Accelerated Reader into our Language Arts program. Accelerated Reader is a computerized reading program. Students select books to read at their individual reading level and then take a computerized test on how well they comprehend the book.

The Accelerated Reader program motivates children to read, which raises their comprehension and reading level. Students set goals for themselves. They are awarded points based on how well they do on each test. Prizes are awarded each nine weeks based on points.

Please encourage your child to bring home an AR book each night and read for at least 15 minutes.
